

# Bird Conservation Strategy

## Chile 2020 – 2030

Tomás Altamirano

April 2021

# Contents

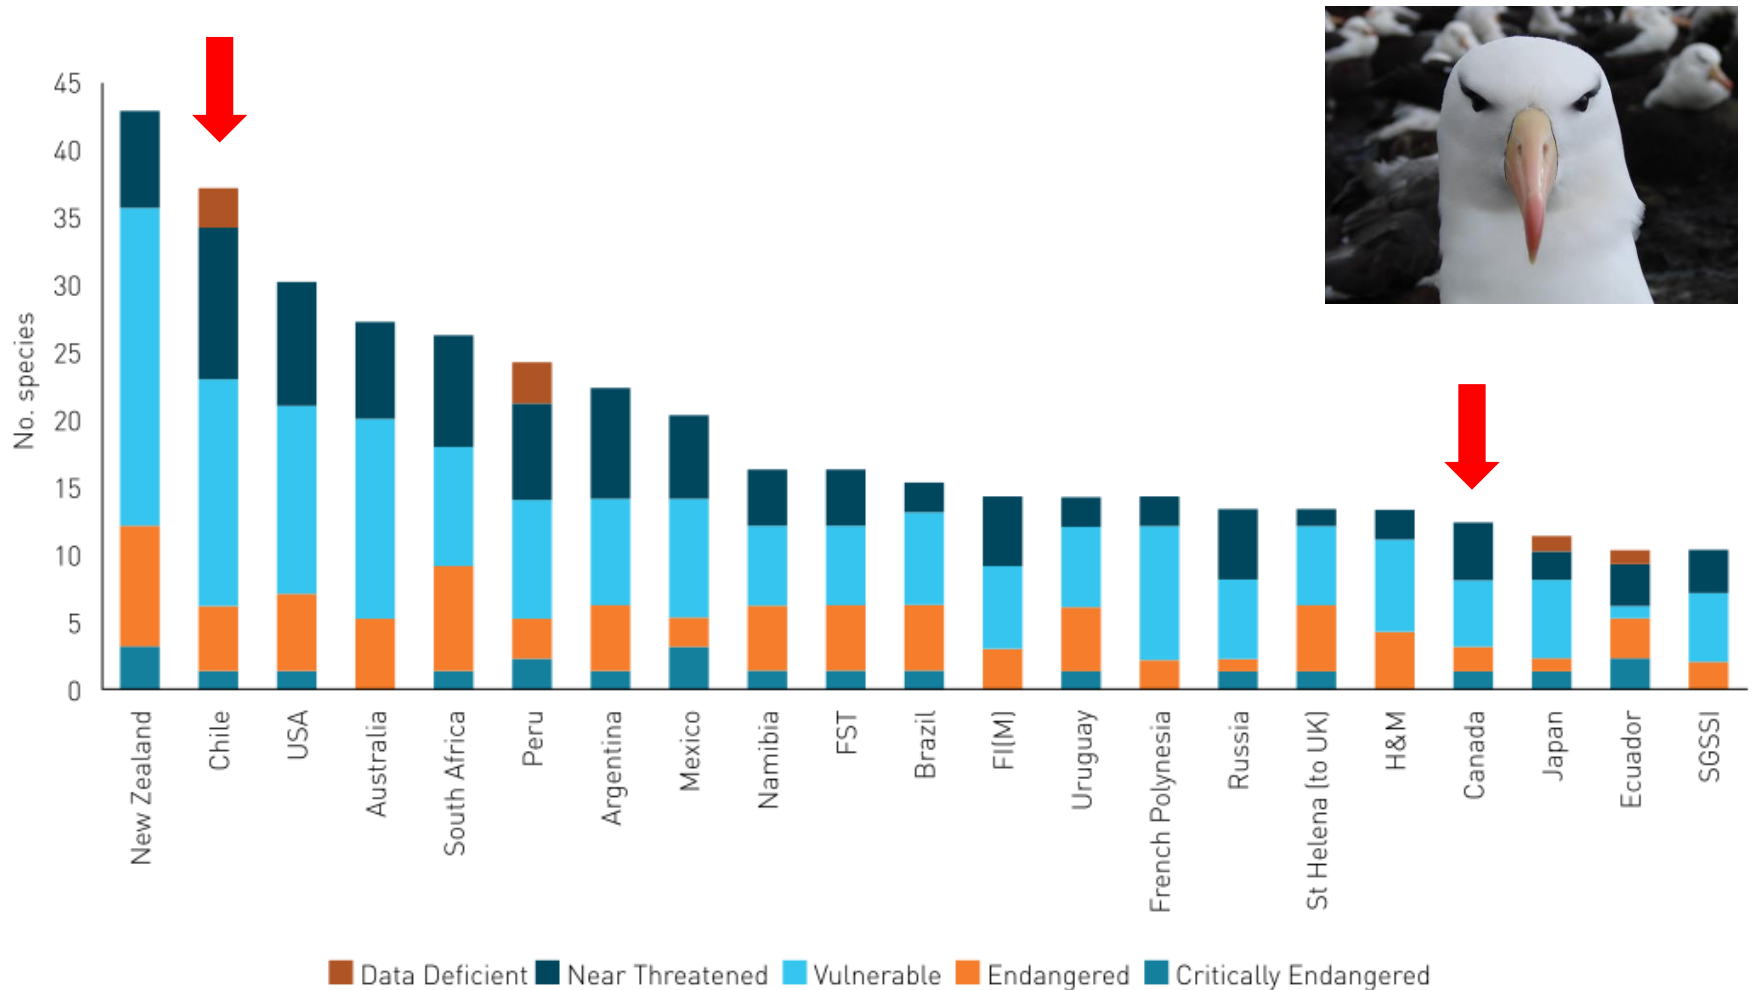

- Why is it important to work together on bird conservation?
- How are we elaborating the bird conservation strategy in Chile?
- What are our conservation targets and action lines?

# Why is it important?

- Most abundant terrestrial vertebrates (~ 10,500 spp)
- Unique birds and ecosystems

# 2<sup>nd</sup> country with more globally threatened seabirds

# How are we building the Bird Conservation Strategy?

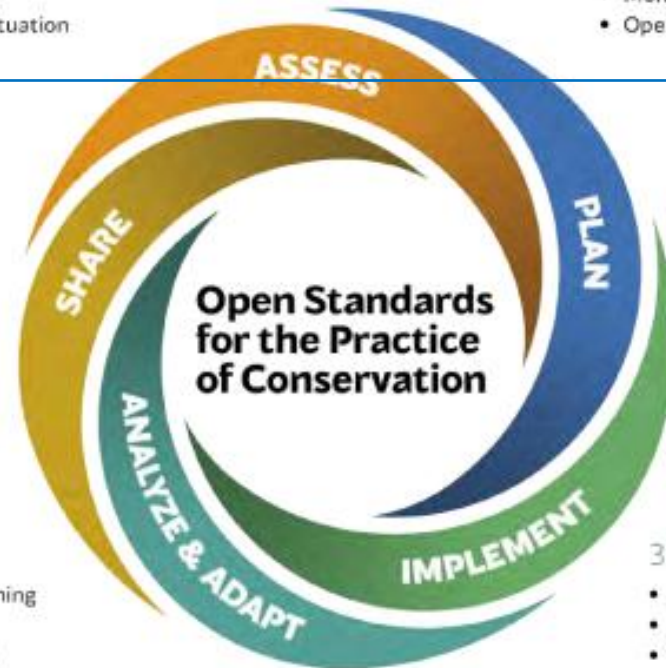

## 1. ASSESS

- Purpose & project
- Scope, vision, & targets
- Critical threats
- Conservation situation

## 2. PLAN

- Goals, strategies, assumptions, & objectives
- Monitoring plan
- Operational plan

## 5. SHARE

- Document learning
- Share learning
- Foster learning

## 3. IMPLEMENT

- Work plan & timetable
- Budget
- Implement plan

## 4. ANALYZE & ADAPT

- Prepare data
- Analyze results
- Adapt plans

# Work team

# Conservation targets

1. Desert birds

2. Shorebirds

3. Birds of Oceanic Islands

4. Seabirds

5. Wetland birds

6. Forest birds

7. Alpine birds

8. Birds of the patagonian steppe

# Wildfires and climate change

# Action guidelines

**Research and monitoring for conservation**

01

**Alliances for conservation**

02

**Political and regulation framework**

03

**Fiscalization and control**

04

**Incentives for conservation**

05

**Finance for conservation**

06

**Management tools**

07

**Education for conservation**

08

# Main message

The Bird Conservation Strategy in Chile can be an opportunities to collaborate with Canada on bird conservation.

We share many bird species, important ecosystems and different threats to birds

Thanks for your  
attention!
